**DEPARTMENT OF WEB AND SOFTWARE DEVELOPMENT**  
**HND SOFTWARE ENGINEERING**  
**COURSES OVERVIEW**

**FIRST YEAR: FIRST SEMESTER**

**1. WSD201: HTML/CSS**

**Credits: 6, Course State: Compulsory (C)**

➤ **Web design:**

- **Introduction to Web Design**

- History of web design
- Basic concepts
- Criteria used in web design
- Colour language
- Some examples and commentaries

➤ **Web and multimedia I :**

➤ **Web design:**

- General information on the Web Design
  - Definitions: web, web design, digital;
  - The trades of Web design;
  - The software used in the Web design;
  - The characteristics of the images for the Web;
  - Optimization of images for the Web;
  - Organization of files;
  - The nomenclature rules of files;
  - Extension of the current files;
  - Optimization of files;
  - Types of files;
  - Dimensions of a web page.

➤ **Initiation to the Web Programming:**

- Adobe Golive: Images
  - Place an image in a page;
  - Inspector palette;
  - Atlttext field;
  - Field HSpace;
  - VSpace field.

- Adobe Golive: images in rollover and the hypertext links
  - Actions open windows;
  - Internal links;
  - External Links.
- Adobe Golive: actions, sheets of CSS styles
  - Usefulness of the CSS.
  - Creation of style sheets;
  - Style sheets inter and external.
- Adobe Golive: definition of styles (HTML)
  - Definition of styles;
  - Styles classes;
  - ID styles;
  - Styles of HTML elements;
  - Character attributes;
  - Attributes of styles;
  - Apply a class style to a selection.
- Adobe Golive: Iframes
  - Creation of an Iframe;
  - Attributes of an Iframe;
  - Compatibility of iframes.
- Adobe Photoshop: images gif with transparent background
  - The bottom of the page; - substance of the image;
  - Indexedcolor.
- Adobe Golive, and HTML: scroll bar customized
  - The scrollbarcolor.

## **2. WSD203: DATABASE MANAGEMENT SYSTEMS**

**Credits: 6, Course State: Compulsory (C)**

### **➤ Introduction to database**

- Fundamental objectives of a database
  - Less redundancy
  - Consistency
  - ACID Properties
  - Multiuser and Concurrent Access
  - Multiple views
  - Confidentiality/integrity
- Flashback on data models
  - Entity-Relationship Model
  - Relational Model
- Normalization(1NF, 2NF, 3NF)
- Relational algebra
  - Relational Algebra

- Relational Calculus
- Practicals on MS access and or Mysql
- **Database administration**
  - Introduction
  - Presentation of Mysql
  - Mysql architecture
  - Mysql server
  - Configuration of Mysql server
    - Running and Shutting down MySQL Server
    - Setting Up a MySQL User Account
    - Administrative MySQL Command
  - Mysql client
    - Presentation of client administration
    - Mysql customer program calls
    - Usage of mysql client
    - Mysql client administration
  - Presentation of data types
  - Metadata
  - Storage engine
  - Partitioning
    - Presentation and advantages of partitioning
    - Creating a partition table
    - Collecting information on partition
    - Modification and suppression of partition
  - Mysql transactions
  - Management of users and security
    - Security risks
    - Security measures
    - Privileges
    - Access level, particularly: 1- users account, 2- database, 3- tables, 4- column, 5- routine storage
    - Management of user account
    - Client access control
    - Usage of secured connection
  - Maintenance of tables
  - Exporting and importing data

### 3. WSD205: PHP I

**Credits: 6, Course State: Compulsory (C)**

- **Advanced Web site programming**
  - PHP code modification
  - CSS code modification

- HTML code modification
- Practical session on PHP, CSS, HTML

#### **4. WSD245: INTRODUCTION TO SOFTWARE ENGINEERING**

**Credits: 6, Course State: Compulsory(C)**

➤ **Digital electronics**

- Number systems and codes
  - Binary, octal and hexadecimal number systems
  - Conversion from one number system to the other
  - Binary codes: BCD, gray, excess – 3, 8:4:2:1; 2:4:2:1 etc
  - Alpha numeric code: ASCII

➤ **Combinational logic**

- Logic gates
- Boolean algebra
- Simplification of Boolean functions
- Applications of combinational logic

➤ **Sequential logic**

- Flip flops
- Counters
- Registers

➤ **Fundamentals of algorithms**

- Introduction to algorithms
- Algorithm approaches: greedy, dynamic programming, divide and conquer, branch and bound, introduction to complexity analysis and measures.
- Algorithms: sorting and searching, merging, tree and graph traversals, shortest path, minimum spanning tree, order statistics, string matching.

➤ **Introduction to information systems:**

• **Specification languages of an information system.**

- Data models(Entity relational models, relational models)
- Processing models(petri diagram, MERISE diagram, SADT diagram)
- Communication models
- Objects models

• **Analysis of the is – the system and opportunities offered**

- Methods of studying an existing information system
- Data representation and processing of an existing information system in terms of the models studied above.
- Quality criteria of an information system
- Criticizing the is – the system
- Study of the opportunities
- Audit

- **Design**

- Data conceptual diagrams
  - Construction of data conceptual diagram
  - Normalization
- Processing conceptual diagram
  - Processing architectural diagram
- Dynamic representation
- Conceptual diagram of a communication system
- Representing a communication system
- Determination of the elements of a communication system
- Object conceptual diagram

- **Information Management system (MERISE)**

- From conceptual to logical level
  - Human – Computer Interface (HCI): Explain what Human computer interaction is and why it is needed
  - Ergonomic elements
  - Data organization
  - Conception of files or database
  - Coding
  - Control
  - Process organization
  - Determination of the nature of processing
- From logical to physical level
  - Programming, test
  - Documentation
  - Maintenance
- Methodology and software tools
  - General presentation of the different methodologies
  - Detail analysis of at least one of the methodologies(MERISE, SADT etc).
  - Evaluation of the cost of the detail study and development
  - Usage of software tools in conceiving and developing the software.

- **Introduction to software engineering**

- Software development life cycle (SDLC)
- Quality
- Specifications
- Ergonomics
- Tests
- Management of requirements
- Control of development
- Writing of specifications
- Methods of estimating the cost

## 5. GDP211: GRAPHIC AND MULTIMEDIA DESIGN

**Credits: 6, Course State: Compulsory (C)**

### ➤ **Computer graphic design**

- Digital images
- Bitmap images
- Vector images
- Characteristics of bitmap images
- Image compression
- Final improvements of images
- Practicals on the creation buttons and images for the Web
- Bitmap and vector file format
- Document and print – out format
- The Design Process
- Elements & Principles of Design
- Typography
- Color Theory & Use
- Creating images for print & web

### ➤ **Visual language:**

- Graphic representations
  - Pictorial symbols;
  - Graphic symbols; - verbal symbols.
- The basic principles of the Gestalt
  - Figure/background;
  - Opening/closing;
  - Proximity;
  - Likeness; - continuity; - color.
- Basic elements of visual language
  - Conceptual elements;
  - Visual elements;
  - Relational elements; - items practices.
- Basic principles of visual composition
  - Balance ;
  - Pace;
  - Harmony; - emphasis; - Unit.
- Composition as a whole
  - Patterns of composition;
  - Lines of force;
  - Strengths;
  - Angular constructions;
  - Golden Rule;
  - The laws of the third and fourth.

### ➤ **Communication plan in graphic design:**

- Client-target;
- The objectives of the communication;
- Axis of communication; - communication strategy;
- Strategy of creation.

➤ **Typography and layout I :**

➤ **Anatomy and typographical Classification:**

• **Anatomy of a letter**

- Wheelbase;
- Axis;
- Loop;
- Body;
- Loosed ;
- Connecting point; - height; - the keg.
- **Basic vocabulary**
  - Basic Terminology; - specific terminology.
- **Typographical Classification**
  - Vox classification;
  - Fonts Humanes;
  - Garaldes fonts;
  - Reais fonts;
  - Didones fonts;
  - Mécanes fonts;
  - Sans serif fonts;
  - Fonts Incises;
  - - Fonts scripts;
  - Manuaires fonts;
  - Fracture fonts; - Onciales fonts; - fancy fonts.

➤ **Implementation typographical Page:**

• **Introduction to the typography**

- The fonts of characters;
- Origin of the writing and fonts (first scriptures, appearance of the alphabet, write the Roman capital, write, roman, gothic Writing, Writing Renaissance, etc.).
- **Evolution of the typography**
- The families of character (fonts to serif, sans serif font, fonts, script, fonts fantasies;
- Importance of typography in the design.

• **Typology and typographical properties**

- The Capitals;
- The bold and italics;
- The condensed and the extended;
- Size and spacing;

- Line spacing and length of line;
- Character plan and background.
- **The measurement systems**
  - The Anglo-American system;
  - The European system;
  - Page layout typographical.
- **Implementation typographical page**
  - Top and bottom;
  - Relationship Figure/background;
  - Static space and space assets.
- **Steps for the Creation:**
  - **Steps for the creation: the pre production**
    - Iconographic Script: realization of the pages of trends (types of objects, materials and colors, TARGET, direct competitor and indirect).
  - **Steps for the creation: the production**
    - Analysis of the sources of inspiration;
    - Graphical research (sketch);
    - Chromatic research (sketch);
    - The final models (model);
    - Production of the model and prototyping.
  - **Steps for the creation: the postproduction**
    - Manufacture in workshop;
    - Commercial strategies;
    - Industrialization.
- **Image processing**
  - **Working With Adobe Photoshop**
    - Images, colours, copies
    - Improve and transform the images
    - Filters and effects, text
    - Vector drawing in photoshop
    - Saving, exportation and printing
    - RAW camera
    - Photoshop innovations
- **Colours**
  - Level of gray
  - Colour
  - True colour
  - Indexed colour
- **Image reproduction modes**
  - Matrix coding
  - Vector coding
  - Curve fractal

- **Compression and compaction**
- **Formats and standards**
  - Matrix image format
  - Vector image format
  - Web adapt format
- **Logo and Icons Realisation**
  - **Logotype**
    - How to create a logo;
    - Qualities of a logo.
    - Types of Logo.
- **Streaming:**
  - Introduction to streaming
  - Realizing streaming
  - Efficient and adapted methods used in importing web elements
  - Adopted tools
- **Introduction to Sound**
  - Definition of sound
  - Characteristics of sound
  - Digitalization of sound
  - Mono and stereo sound
  - Size of a sound file
  - Sound compression
- **Introduction to Video**
  - Definition of video
  - Analogue video
  - Digital video
  - Compression of digital video (notion on Codec)
- **Streaming:**
  - Introduction to streaming
  - Realizing streaming
  - Efficient and adapted methods used in importing web elements
  - Adopted tools

## **6. FRE101: BASIC FRENCH LANGUAGE I**

**Credits: 2, Course State: Required (R)**

- **Etude des situations de communication**
  - Identification des facteurs de la situation de communication (émetteur, récepteur, code, canal, message, contexte) ;
  - Situation de communication et interactions verbales ;
  - Etude des éléments para verbaux (kinésique, proxémiques, mimogestuels, etc.) ;

- Identification et manipulation des figures d'expression et de pensée (métaphores, ironie, satire, parodie, etc.).
- **Typologie des textes et recherche documentaire**
  - Lecture des textes de natures diverses (littéraires/non littéraires, image fixe/image mobile, dessin de presse, caricature, etc.);
  - Analyse des textes publicitaires et des discours (scientifiques, politiques, littéraires, etc.) ;
  - Constitution et exploitation d'une documentation et montage des dossiers;
  - Lecture des textes cultivant les valeurs morales et civiques.
- **Communication orale**
  - Réalisation d'un exposé ;
  - Réalisation d'une interview ;
  - Réponse à une interview ;
  - Présentation d'un compte-rendu oral ;
  - Résumé de texte ;
  - Réalisation d'un jeu de rôles ou d'une simulation ;
  - Initiation au leadership et à la dynamique des groupes ;
  - Ecoute et lecture attentive de documents sonores et/ou graphiques ;
  - Lecture méthodique à l'oral.

## 7. ENG101: BASIC ENGLISH LANGUAGE I

**Credits: 2, Course State: Required (R)**

- **Vocabulary**
  - Technical and usual vocabulary of the specialty
- **Grammar**
- **Bilingual expression**
  - Understanding in interaction in Technical Discussions
  - Continuous oral communication: Show, explain, develop, summarize, account, comment;
  - Interactions oral communication
  - How to introduce oneself
- **Autonomous reading of "writings" of all levels**
  - Lead by a quick reading to understand the general sense;
  - Browse a text long enough to locate desired information;
  - Gather information from different parts of the document or of the different documents in order to accomplish a specific task.
- **Write clear, detailed texts**
  - Essay writing;
  - Application for employment;
  - C.V.
  - Letter of motivation;
  - Lettre / memo writing and minutes of a meeting

## 8. DIL101: DIGITAL LITERACY

**Credits: 4, Course State: Required (R)**

### ➤ **Computer fundamentals**

- Hardware
- Networks and mobile devices
- Software
- Operating system
- File management
- Security and maintenance
- Cloud computing

### ➤ **Memory Management**

- Partitioning, paging and segmentation
- Virtual memory
- Page Faults
- Address translation and page fault handling
- Memory management hardware: page table and Translation
- Memory management algorithms: fetch policy, replacement policy

### ➤ **Input / Output Management and Disk Scheduling**

- I/O devices
- Organization of I/O function
- I/O buffering
- Disk scheduling, RAID

### ➤ **File Management**

- File systems
  - o File systems interface
  - o File system structures
- Organization: files and directories
- Secondary storage management, file systems: FAT and NTFS
- File protection & Security

### ➤ **Deadlocks**

- Conditions for deadlocks
- Deadlock avoidance
- Deadlock prevention
- Research on deadlocks

### ➤ **Multi processor systems**

- Multicomputers
- Virtualization
- Distributed systems

### ➤ **Operating system security**

- Cryptography
- Authentication

- Malware etc.
- **Key applications**
  - Apps and applications
  - Using Microsoft word
  - Using Microsoft Excel
  - Database concepts
  - Using Microsoft power point
- **Living online**
  - Looking at the Internet
  - Managing media literacy
  - Digital communication
  - Understanding e – mail
  - Contacts and calendaring
  - Your life online
- **Internet Services**
  - Internet and its services
  - Operation of the Web
  - Addressing of Web documents

## **FIRST YEAR: SECOND SEMESTER**

### **1. WSD202: JAVASCRIPT**

**Credits: 6, Course State: Compulsory (C)**

### **2. WSD232: PROGRAMMING I - C**

**Credits: 6, Course State: Compulsory (C)**

- **Factual programming and Human Computer Interface**
  - Concepts on object oriented programming(OOP)
  - Practice of OOP
  - Windows applications, Web application
  - To distribute the application(setup)
  - Introduction to database programming with ADO.NET
- **C Programming**

### **3. WSD236: PROGRAMMING II - JAVA**

**Credits: 6, Course State: Compulsory (C)**

- **Object oriented programming with Java**
  - Introduction to object oriented programming
  - Objects and class
  - Encapsulation and masking of information
  - Aggregation and decomposition
  - Generalization and specialization
  - Inheritance

- Polymorphism and dynamic links
- Examples of OOP: C++, Java

➤ **Java Programming**

#### 4. WSD240: ENGINEERING MATHEMATICS I

**Credits: 6, Course State: Compulsory (C)**

➤ **Basic Mathematics**

- Mathematics:
  - Functions of a real variable
    - Focus on the aesthetic aspect of the curves;
    - Tangent at a point where the vector derivative is not null;
    - The study of singular points and branches endless is not payable.
  - Vector calculation
  - Geometric modeling

➤ **Physical:**

- Mechanical
  - Mechanical action;
  - Balance of a solid;
  - Fluid mechanics.
- **Materials**
  - The polymers; and other.
- Behavior of Materials
  - Resistance of Materials;
  - Maintenance of tissues.

➤ **Numerical functions of a real variable:**

- Logarithmic and exponential functions
- Reciprocal circular functions
- Hyperbolic functions and their reciprocals.

➤ **Several real variables functions**

- 1st and 2nd order partial derivative
- Schwarz theorem
- Differential applications
- Composite functions
- Differential forms
- Vector operators

➤ **Analysis I**

- Numerical functions of a real variable:
  - Logarithmic and exponential functions
  - Reciprocal circular functions
  - Hyperbolic functions and their reciprocals.
- Several real variables functions
  - 1st and 2nd order partial derivative

- Schwarz theorem
- Differential applications
- Composite functions
- Differential forms
- Vector operators
- **Taylor series and limits**
- **Integration(simple and multiple)**
- **Differential equations**
  - Linear algebra I:
- **Vector space of finite dimension  $n \leq 4$**
- **Matrices**

## **5. WSD242: MAINTENANCE AND OPERATING SYSTEMS**

**Credits: 6, Course State: Compulsory (C)**

- **Operating system I**
  - Overview of computer system and operating system
  - History of operating systems
  - Operating system structure
  - Processes, files, system call, the shell
  - The Kernel
  - Monolithic Kernels
  - Micro-kernels
- **Operating system Design Case Studies**
  - Linux
  - Windows 7
  - Symbian OS
  - Windows 10
  - Windows 11
  - MAC OS
- **Process Management**
  - Process description and control
  - Process Interrupts
  - Context Swapping
  - Process scheduling:
    - First Come First Served
    - Round Robin Scheduling
    - Shortest Process Next
    - Shortest Remaining Time
  - Threads, Symmetric Multiprocessing
- **Inter-process Communication & Clock Synchronization**
  - Mutual exclusion and critical section
  - Race Conditions

- Semaphores
- IPC Problems

➤ **Installation and maintenance of hardware and software**

- Electronic circuits
  - Circuit laws and theorems
  - Introduction to semiconductors
  - Technology of electronic components:
    - Resistors
    - Capacitors
    - Inductors
    - Transformer
    - Diodes
    - Transistors
    - Linear regulated power supply
    - Transformer regulated power supply
    - Transformerless regulated power supply
    - Switch mode power supply
    - Amplifiers
    - Transistor amplifiers
    - Operational amplifiers

➤ **Computer maintenance**

- Hardware maintenance
- Software maintenance
- Computer assembly

➤ **Legal regulations**

- The intervenors
  - General regulations:
  - Copyright and related laws
  - Types of intervenors
  - The supplier
  - The client
  - Adviser
  - Jurist

➤ **Market research**

- Market demand
- Mastery of the market
- Market trends
- Market offer
- Study of the needs
- Customer prospection techniques
- Copyright laws on software

➤ **Standard software**

- **Specific software**
- **Protecting programs and database**

## **6. CVE102: CIVICS, ETHICS AND LAW**

**Credits: 4, Course State: Required (R)**

- **Civics and Moral education**
  - The citizen
  - The nation
  - The state
  - Public goods – collective goods
  - Freedoms
  - Public services
  - Ethical problems
  - Ethics, rights and privileges
  - Management and ethics of the responsibility
  - Ethics and management
  - Civics
  - Deontology
  - Moral consciousness
  - The universal declaration of Human Rights
  - Good governance in public services
  - The importance of civics to the life of the nation
  - Functions of the state and its citizens
  - Deontology, Professional ethics and professionalism
  - Relationship between morality, law and ethics
  - Codes of ethics
- **Business Law**
- **Civil Law:**
  - Definition, characteristics, branches and sources of law
  - Scope of application of the law
  - Dimensions of law (objective law, Subjective law)
  - Legal organisation
  - The right of a legal personality
  - Marital status, name and address
  - Disabilities
  - Legal acts
  - Legal facts
- **Labour law:**
  - Definition of labour law, birth and evolution of labour law and sources
  - The employment contract (conclusion, implementation and breach)
  - Labour disputes (individual and collective)
  - The staff delegate, Trade Unions

- Labour accidents and occupational diseases
- Health and safety at work

## **7. IPL102: INTEGRATION TO PROFESSIONAL LIFE**

**Credits: 4, Course State: Required (R)**

### ➤ **Enterprise creation**

- Characteristics of the entrepreneur
- Opportunity recognition
- Starting a business
- Business operation

### ➤ **Economics and Enterprise Organization(EEO)**

- Enterprise and typology of enterprises
  - Definition of an enterprise
  - Analysis mode
  - Enterprise as a production unit
  - Enterprise as a distribution unit
  - Enterprise as a social center
  - Classification of enterprise based on the following economics criteria
    - According to economic activities
    - According to dimension
    - According to judicial criteria
- Organizational structure of an enterprise
  - Distribution of tasks and power hierarchy
    - Distribution of tasks
    - Organizational structure
    - Departmental structure
    - Site location
    - Practical structure
  - Power hierarchy
    - Functional hierarchy
    - Staff and line hierarchy
  - Coordination and relationships in the enterprise
    - Coordination of tasks in the enterprise
    - Relationships in the enterprise
- Insertion of the enterprise into the economic web
- Basic notions on the enterprise environment
- Inter – enterprise relationship
  - Competing relationship
  - Complementary relationship
- Relationship between the enterprise and other aspects of the environment.

### ➤ **Income earning activities**

- Commercial policies (the 4p)

- Policy of the products
- Price policy
- Distribution policy
- Communication policy

➤ **Production and processing policies**

- Production policy:
  - Production on command
  - Production in series
  - Continuous production
- Processing policy
  - Studies and research office
  - Methods office
  - Office of scheduling and launching
- Various production methods (influence of technology on production)
  - Mechanization, automation and computer assisted production (CAP)
  - Quality policies (Production control)
    - At the level of production factors
    - At the level of work advancement
    - At the level of quality
  - Work organization and evolution
    - Taylorization
    - Fordism
    - The actual form of a work organization
    - Robotization, enrichment,
- Know how to undertake
  - Steps of the creator
  - Steps of the decision maker
  - Steps of the manager
- Information system and decision system
  - Importance of information and communication to an enterprise
  - Organization of an information system:
- Data bank
- Database
- Communication networks
  - contribution of information as regards information system
  - Decision processing
  - Types of decision
  - Tools that helps in decision-making
- Decision in unquestionable future
- Decision in questionable future
- Capacities and participation in the company
  - Delegation of authority

➤ **General Economics**

- Introduction
  - Classification of economic actors
  - Economic operators
  - Relationship between economic agents: economic circuits ;
  - Basic notions on national accounting: aggregates and their circuit; products, revenue, expenses.
- Consumption
  - Demographic elements
  - The needs, the level of life, way of life.
  - Individual consumption and collective consumption
  - The demands
- Production
  - Production units, the sectors and branch activities
  - Production factors and their combinations, offers concentration
- Growth and development
  - Growth
    - Definition and measures
    - Growth factors
    - Growth and notions on neighbors
  - Development
    - Definition
    - Development criteria

➤ **The payment of the international exchanges**

- The exchange
- Formation of exchange rate
- Tests of international monetary organization and its difficulties.

➤ **Decentralization of decision making**

➤ **General Accounting**

- Heritage
- Influx at an enterprise and its registration
- Balance sheet and results
- law and accounting plan
- Buying and selling
- Expenses and products
- Incidental expenses on buying and selling
- Packing supplies
- Transport
- Classical accounting system
- Balancing of accounts
- Cash regulations
- Terms regulation

- Depreciations
- Provisions
- **Projects Management**
  - Project Management Overview
  - Projects in the business environment
  - Projects Definition
  - Estimates
  - Project Planning
  - Project Execution
  - Project Monitoring & Control
  - Project Quality
  - Leadership in Projects
  - Projects' success & failure
  - Project Closure & Audit
  - Conclusions & Presentations

## **SECOND YEAR: FIRST SEMESTER**

### **1. WSD339: PROGRAMMING III – VB.Net**

**Credits: 6, Course State: Compulsory (C)**

- **Structured programming**
  - Introduction
  - Data types, Variables, Constants, C operators, types conversions in expression, input and output and expression statements.
  - Branching and looping, arrays and string, functions, pointers, structures, unions, linked list and file management
- **Factual programming**
  - Introduction to visual basic and .NET
  - Visual studio development environment
  - Syntax of VB.NET
    - Form and control elements
    - Control structures
    - Procedures
    - Identification and elimination of errors

### **2. WSD341: ENGINEERING MATHS II**

**Credits: 6, Course State: Compulsory (C)**

- **Probability**
- **Combinatory analysis**
  - Calculation of probabilities
    - Kolmogorov axioms
    - Conditional and independent probabilities
    - BAYES theorem and axiom on total probability

➤ **Random variables**

- Definition
- Moment of a random variable
- Joint law and marginal laws of a pair
- Bienaymé-Tchebychev Inequality
- Basic laws on large numbers
- TCL

➤ **Probability laws**

➤ **Statistics:**

- Graphical representation;
- Central tendency, dispersion, (mean, mode, median, variance, and standard deviation, deciles, interquartile range);
- Covariance;
- Correlation coefficients and regression;
- Least square methods;
- Estimation of mean and standard deviation;
- Test of hypothesis
- Descriptive statistics;

➤ **Analysis III**

- Whole series and Fourier series
- Fourier transform, Laplace transform and Z transform

### **3. WSD343: DATA STRUCTURES**

**Credits: 6, Course State: Compulsory (C)**

➤ **Database and SQL**

- Relational database conception principles
  - Functional dependence
  - Algorithms and normalization
  - Normal forms
  - Integrity constraints (static, dynamic, etc)
- SQL language
- Database administration
  - Physical implementation of the data
  - Structure of the file and index
  - Control of concurrent access
  - Breakdown resistance
  - Security and protection of data
  - Parameter setting, start, stop, save, restoration
  - Distributed database, distributed processing
  - Auditing, optimization

➤ **Advanced data structure I**

- Function and procedures

- Notion on recursiveness
- Search techniques(sequential, sequential with guard, dichotomy)
- Sorting techniques(insertion, selection, bubbles)
- Practical on one of the programming languages(C, C++)
- **Advanced data structure II**
  - Files
  - Single and double linked list
  - Stacks
  - Tables
  - Practical using one of the programming languages(C, C++)
- **Database and human Computer Interface(HCI)**
  - Principles on how to create Human Computer Interface
  - Factual programming
  - Data access methodology(ADO, ODBC, OLE DB, ....)
  - Practicals on Visual basic, .NET, ou developer.

#### **4. WSD345: COMPUTER ARCHITECTURE**

**Credits: 6, Course State: Compulsory (C)**

- **Internal architecture and operation of a microprocessor**
  - Program counter
  - Registers
  - Instruction registers
  - Instruction decode
  - Arithmetic and logic unit
  - Accumulator
  - Flag register
  - Bus
  - Opcode
  - Operand
  - Machine cycle
  - Polling
  - Interrupts
- **Computer Memory**
  - Types and technological structure
  - Memory hierarchy
  - Installing memory
  - Organizational structure and uses
- **Assembly language**
  - Assembler
  - Editors
  - Instruction sets
  - Addressing modes

- Control structures
- Sub routines
- Interrupts
- **Interfacing techniques**
  - Notion on communication
  - Conversion of signals (ADC and DAC)
  - Parallel interface
  - Serial interface
- **Technology of peripherals**
  - New technologies

## 5. WSD347: SYSTEMS AND NETWORKS

**Credits: 6, Course State: Compulsory (C)**

- **Computer networks I**
  - Transmission problems encountered in a network
  - Computer networking basics: hardware and software
    - Transmission of information
      - Media
      - Topology
      - Coding
      - Access techniques
      - subnetting
      - Hardware: MODEMs repeaters, communication controllers
    - Management of communication in a network
      - Synchronization
      - Errors control
      - Flow control
      - Routing
      - Addressing
      - Switching
    - Architecture:
      - Concept of layers
      - Concept of service
      - Protocols
      - OSI model
      - Other standards
      - Services intended for inter operation of the systems
      - Data representation
      - Calls of remote procedures
    - Criteria used to choose a network(characteristics, organization, services offered etc)
      - LAN: Ethernet, Token ring

- Public networks (PSTN etc)
- High data rate networks

## 6. WSD349: OBJECT ORIENTED MODELLING

**Credits: 6, Course State: Compulsory (C)**

### ➤ Introduction to object modeling

- Basic techniques of modeling computer systems
- Overview of Prominent Object-oriented Methodologies
- Introduction to UML (Unified Modeling Language)
- Overview of the development process
- Study of the various UML diagrams (structural and behavioral diagrams)
- Class Diagram (attributes, association, aggregation, composition, generalization, parameterized classes)
- Use Case diagram.
- Interaction diagrams (sequence diagram, collaboration diagram).
- State Diagram and Activity Diagram.
- Introduction to object-oriented design (inheritance, encapsulation, polymorphism, abstract interfaces, parameterized types).
- Design patterns in object-oriented design modeling of the source code.
- Modeling executable versions.
- Workshop on object oriented software engineering

## SECOND YEAR: SECOND SEMESTER

### 1. WSD340: ENGINEERING MATHEMATICS III

**Credits: 6, Course State: Compulsory (C)**

#### ❖ General Revision in Engineering Mathematics

##### ➤ Numerical functions of a real variable:

- Logarithmic and exponential functions
- Reciprocal circular functions
- Hyperbolic functions and their reciprocals.

##### ➤ Several real variables functions

- 1st and 2nd order partial derivative
- Schwarz theorem
- Differential applications
- Composite functions
- Differential forms
- Vector operators

##### ➤ Analysis I

- Numerical functions of a real variable:
  - Logarithmic and exponential functions
  - Reciprocal circular functions
  - Hyperbolic functions and their reciprocals.

- Several real variables functions
  - 1st and 2nd order partial derivative
  - Schwarz theorem
  - Differential applications
  - Composite functions
  - Differential forms
  - Vector operators
- **Taylor series and limits**
- **Integration(simple and multiple)**
- **Differential equations**
  - Linear algebra I
- **Vector space of finite dimension  $n \leq 4$**
- **Matrices**
- **Probability**
- **Combinatory analysis**
  - Calculation of probabilities
    - Kolmogorov axioms
    - Conditional and independent probabilities
    - BAYES theorem and axiom on total probability
- **Random variables**
  - Definition
  - Moment of a random variable
  - Joint law and marginal laws of a pair
  - Bienaymé-Tchebychev Inequality
  - Basic laws on large numbers
  - TCL
- **Probability laws**
- **Statistics:**
  - Graphical representation;
  - Central tendency, dispersion,(mean, mode, median, variance, and standard deviation, deciles, interquatile range);
  - Covariance;
  - Correlation coefficients and regression;
  - Least square methods;
  - Estimation of mean and standard deviation;
  - Test of hypothesis
  - Descriptive statistics;
- **Analysis III**
  - Whole series and Fourier series
  - Fourier transform, Laplace transform and Z transform

## 2. WSD342: MOBILE TERMINAL AND APPLICATIONS SECURITY

**Credits: 6, Course State: Compulsory (C)**

➤ **Programming of mobile terminals**

- Generalities
- Android operating system
- Some elements on the embarked programming
- Generalities on the development environment of iOS applications
- Identify the different types of mobile terminals
- Web applications for mobile platforms
- Java scripts
- Cordova
- AngularJS

➤ **Application security**

- Security requirement
- Security architecture
- Secure coding practices
- Vulnerability assessment
- Security patch up date

**3. WSD344: NETWORK AND SYSTEM ADMINISTRATION**

**Credits: 6, Course State: Compulsory (C)**

➤ **Computer networks II**

- Interconnection of networks
- Specifications of a network
- Installation and configuration of a network
- Splitting of a network
- Networks in industries and enterprises
- Usage of network applications: messaging, transfer of files etc
- Services of network administration
- Surveillance and security of a network

➤ **Windows server administration fundamentals**

- Installation of a Window server
- Identify application servers
- Understand web services
- Understand remote access
- Understand file and print services
- Understand server virtualization
- Management of groups infrastructure and policy
- Storage technologies and scenarios
- Troubleshooting methods

➤ **Linux network administration**

- Linux system
  - History

- Main characteristics
- System architecture
- Tree structure
- Users and group of users
- Connection/disconnection
- Data protection
- Syntax
- Main commands used
- Text editor
- Communication tool

➤ **System administration commands**

#### **4. WSD380: INTERNSHIP**

**Credits: 6, Course State: Compulsory (C)**

- 8 Weeks Internship
- **Methodology for drafting the report of internship:**
  - The collection of information
  - How to make a report
  - The plan of the probationary report and the Executive Summary
  - The Table of Contents
  - The introduction of the report of internship
  - The conclusion of the Internship report
  - The Acknowledgments
  - How to build the annexs
  - When to start his internship report
  - How to find a subject of Internship report
  - The cover page
  - How to write effectively
  - Form and presentation (coverage, MSDS, summary, bibliography, glossary, index of figures, tables and illustrations)
  - Instructions and typographical rules of presentation (police, spacing, titles, highlighted, punctuation, graphic charter)
  - How to prepare the defense

#### **5. WSD390: ACADEMIC PROJECT**

**Credits: 12, Course State: Compulsory (C)**

- Personal Practical Project (70%)
- Written Project (Project Report) (30%)

# HND SOFTWARE ENGINEERING

## MAJOR COURSES

### FIRST YEAR: FIRST SEMESTER

SN	COURSE CODE	STATE	CREDIT VALUE	COURSE TITLE
01	WSD201	C	6	HTML/CSS
02	WSD203	C	6	Database Management Systems
03	WSD205	C	6	PHP I
04	WSD245	C	6	Introduction to Software Engineering
05	GDP211	C	6	Graphic and Multimedia Design
06	FRE101	R	2	Basic French Language I
07	ENG101	R	2	Basic English Language I
08	DIL101	R	4	Digital Literacy
<b>Total Credits:36</b>				

### FIRST YEAR: SECOND SEMESTER

SN	COURSE CODE	STATE	CREDIT VALUE	COURSE TITLE
01	WSD202	C	6	JavaScript
02	WSD232	C	6	Programming I - C
03	WSD236	C	6	Programming II - Java
04	WSD240	C	6	Engineering Mathematics I
05	WSD242	C	6	Maintenance and Operating Systems
06	CVE102	R	4	Civics, Ethics and Law
07	IPL102	R	4	Integration to Professional Life
<b>Total Credits: 38</b>				

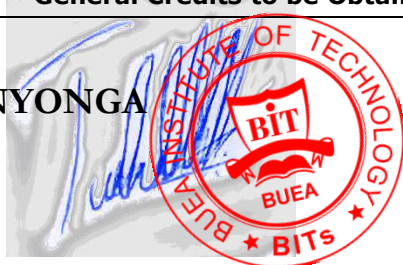

### SECOND YEAR: FIRST SEMESTER

SN	COURSE CODE	STATE	CREDIT VALUE	COURSE TITLE
01	WSD339	C	6	Programming III - VB.Net
02	WSD341	C	6	Engineering Mathematics II
03	WSD343	C	6	Database Structure
04	WSD345	C	6	Computer Architecture
05	WSD347	C	6	Systems and Networks
06	WSD349	C	6	Object Oriented Modelling
<b>Total Credits: 36</b>				

### SECOND YEAR: SECOND SEMESTER

SN	COURSE CODE	STATE	C. VALUE	COURSE TITLE
01	WSD340	C	6	Engineering Mathematics III
02	WSD342	C	6	Mobile Terminals and Applications Security
03	WSD344	C	6	Network and System Administration
04	WSD380	C	6	Internship
05	WSD390	C	12	Academic Project II
<b>Total Credits: 36</b>				
<b>General Credits to be Obtained: 146</b>				

**TEGHEN Clovis MONYONGA**  
Dean of Studies

Date: Monday, July 17<sup>th</sup> 2023
